

Name:

Bluebirds - Life Cycles

Nature has many cycles. The sun rises, crosses the sky, and sets each day. The water cycle is critical to survival for many living things. Your school day is a cycle, too. You arrive, study some subjects, have lunch, study some more stuff, and finally head home. Your school day cycle can be interrupted by events like: holidays, weather, and illness.

Natural cycles are impacted by events, as well. Although all the kids at school behave in the same general cycle, there are differences. Some classes study language arts first. Others may begin their day with science or math.

1. Use a table to compare the life cycle of the bluebirds with an amphibian species.

Bluebird - Eastern, Mountain, Western	Amphibian -

2. Examine the Table:

How are the life cycles similar?

How are the life cycles different?

Name:

Bluebirds Project – Life Cycles cont...

Weather can impact the cycle of a school day. The day could be cancelled, or start later. You could even be dismissed early, cutting the day short.

Name 4 ways weather could impact the life cycle of a bluebird.

How do birds change their behavior to cope with the weather? _____

What actions by people can negatively impact the life cycle of bluebirds? _____

What actions can people take to have a positive impact on bluebirds? _____
